

BroadcastMed | Psychologist: Are there support services for my family?

SHIRLEY A. GAZABON-CAMARGO: We provide services to not only the patient, but also the family members, especially when there is significant stress in a marriage or in the family, impacting the patient's ability to make the proper decisions and follow up with treatment. So we are here to provide couples counseling, family therapy, and assist in any parenting difficulties the patient is having as part of their consultation.
